

THERMAPRO LOW-E GLASS

Why Go ThermaPro?

ThermaPro Low-E glass is a smart choice. With incredible energy efficiency, you don't have to sacrifice style to conserve energy. ThermaPro Low-E glass is designed to maintain the temperature in your garage. The Low-E coating on ThermaPro **locks out the cold or the heat**. Choose the option that suits your needs and feel the difference.

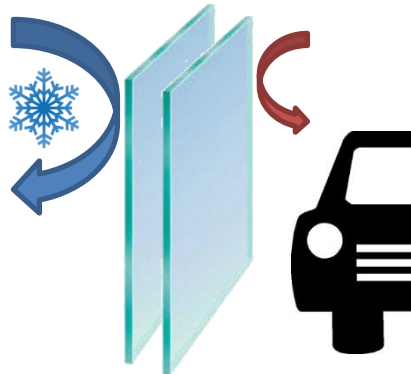

**Single Pane
ThermaPro Low-E**

Single pane Low-E glass reflects the sun for energy efficiency. This Low-E option provides an energy efficient alternative to traditional clear insulated glass. Available in clear glass.

Climate Zones – All

Features

1. Single pane
2. Low-E coating on inside surface

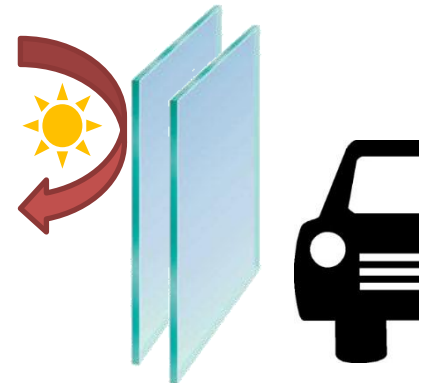

**CoolLock
ThermaPro Low-E**

The CoolLock insulated Low-E option is perfect if **locking out the cold** is your goal. The energy-efficient, fade-protection Low-E surface coating ensures that your garage maintains its temperature by keeping radiant heat in.

Climate Zones – Northern & North-Central

Features

1. Insulated
2. Low-E coating on inside surface of **exterior** pane
3. Optional performance tint

**HeatLock
ThermaPro Low-E**

HeatLock insulated Low-E glass is designed to **lock out the heat**. The fade-protection Low-E surface coating is energy-efficient and reflects solar heat to maintain your garage's temperature.

Climate Zones – Southern, South-Central & North-Central

Features

1. Insulated
2. Low-E coating on inside surface of **interior** pane
3. Optional performance tint
